Recommendation letter

Dear Madams and Sirs,

I am pleased to learn that Ms. Zinayida Petrushyna has been awarded a full scholarship to attend the Joint European Summer School for Technology Enhanced Learning 2009, in Terchova, Slovakia, May 30 – June 6, 2009.

I am her doctoral supervisor at the chair of information systems and database technology, RWTH Aachen University, Aachen, Germany. Ms. Petrushyna is working on analysing social networks in e-learning communities. She has already gained experience with project work in the European TEMPUS project CUELC where the Cairo University implements a university wide E-Learning course system on the basis of the open source e-learning software Moodle. She is also responsible for community facilitation and research on social learning strategies in the new European integrating project on responsive open learning environments called ROLE. Her master thesis also performed under my supervision has been published as a full paper at the European Conference on Technology Enhanced Learning (EC-TEL 2008). She will also conduct a workshop on basic principle of social network analysis for e-learning at the summer school.

I strongly approve her participation in the summer school. I thank you for this unique opportunity.

Sincerely yours,

Prof. Dr. Matthias Jarke
